Bread, Rolls, Biscuits

BOSTON BROWN BREAD

1 egg, well beaten	$\frac{1}{2}$ c. raisins
$\frac{1}{4}$ c. molasses	$\frac{1}{3}$ c. whole wheat or graham flour
$\frac{1}{4}$ c. sour milk	$\frac{3}{4}$ c. corn meal, yellow
$\frac{1}{2}$ tsp. soda	$\frac{1}{3}$ c. Wingold flour
$\frac{1}{2}$ tsp. salt	1 tsp. Calumet baking powder

Add molasses, milk and other ingredients to beaten egg. Put into well greased brown bread cans, cover each and place them into shallow pan with one and one-half inches of water. Bake in moderate oven about $1\frac{1}{2}$ hrs. This recipe will make one large loaf, or two smaller ones.

BRAN BREAD

The following recipe for a health bread was prescribed by a physician.

3 c. whole wheat flour	3 tblsp. molasses
1 c. bran	1 tsp. soda
Pinch of salt	Buttermilk to make soft dough
1 tsp. Calumet baking powder	

Stir all ingredients together. Bake 45 min. in a moderately hot oven. This is usually baked in a tea or coffee can, that will leave little of the surface exposed to crust over. This could be made entirely of unsifted graham flour, as the amount of bran would be about the same.

GRAHAM BREAD

1 cake Fleischmann's yeast	4 tblsp. light brown sugar or molasses
1 c. milk, scalded and cooled	
1 c. lukewarm water	4 c. graham flour
2 tblsp. lard or butter	1 c. sifted Wingold flour
	1 tsp. salt

Dissolve yeast and sugar, or molasses, in lukewarm liquid. Add lard or butter, then flour, gradually, and lastly the salt. Knead thoroughly, being sure to keep dough soft. Cover and set aside in a warm place to rise, for about 2 hrs. When double in bulk, turn out on kneading board, mould into loaves, and place into well greased pans, cover and set to rise again—about 1 hr., or until light. Bake 1 hr., in a slower oven than for white bread. If wanted for over night, use $\frac{1}{2}$ cake of yeast and an extra tsp. salt.

GRAHAM BREAD

$\frac{2}{3}$ c. molasses	3 c. graham flour
$\frac{1}{3}$ c. sugar	1 c. Wingold flour
$2\frac{1}{2}$ c. sour milk	1 c. nuts
2 tsp. soda	1 c. raisins

Mix thoroughly. Let rise in pans 1 hr., then bake 1 hr.

NUT BREAD

4 c. Wingold flour	1 egg, beaten light
$\frac{1}{2}$ c. sugar	2 c. milk
4 tsp. Calumet baking powder	1 c. chopped walnuts
1 tsp. salt	

Mix and sift dry ingredients; add milk to egg, then add to flour mixture, add nuts. Let rise 1 hr. in pans, then bake 1 hr. Half this mixture makes one loaf.

NUT BREAD

1 c. warm water	1 tblsp. molasses
$\frac{1}{2}$ Fleischmann's comp. yeast	1 c. walnuts, chopped
Rye and graham flour for soft sponge	1 tsp. salt
	Wingold flour to make stiff dough

Set in morning. Dissolve yeast in water, adding rye and graham flour, and molasses. When light, add wheat flour to make stiff dough and the nuts and salt. Let rise again, form into loaf.

OATMEAL BREAD

1 cake Fleischmann's yeast	$\frac{1}{4}$ c. brown sugar
2 c. boiling water	$\frac{1}{2}$ c. lukewarm water
2 c. rolled oats	4 c. sifted Wingold flour
	1 tsp. salt

Pour 2 c. boiling water over oatmeal, cover and let stand until cool. Dissolve yeast and sugar in $\frac{1}{2}$ c. lukewarm water and add this to the oatmeal and water. Add 1 c. flour, or enough to make an ordinary sponge. Beat well. Cover and set aside in a moderately warm place to rise for 1 hr., or until light. Add enough flour to make a dough—about 3 c., lastly the salt. Knead well. Place into greased bowl, cover and let rise in a moderately warm place, until double in bulk—about $1\frac{1}{2}$ hrs. Mould into loaves, fill well greased pans half full, cover and let rise again about 1 hr. Bake 45 min. in a hot oven. $\frac{1}{2}$ c. of chopped nuts and 1 tblsp. lard or butter may be added.

OATMEAL NUT BREAD

1 c. hot water	2 c. graham flour
1 c. oatmeal	1 c. nuts, chopped
1 c. milk, scalded and cooled	$\frac{1}{2}$ c. raisins, chopped
1 Fleischmann's comp. yeast	$\frac{1}{2}$ c. dark brown sugar
1 tblsp. butter	1 tsp. salt

Pour hot water over oatmeal. Add yeast and butter to milk. Combine the two and add other ingredients. Let stand in covered bowl till light. Add Wingold flour enough to make stiff dough. Divide into loaves; put into pans; set warm till light. Bake 1 hr. in medium oven.

RAISIN BREAD

1 cake Fleischmann's yeast	$\frac{3}{4}$ c. sugar
1 c. lukewarm water	4 tblsp. lard or butter
1 c. milk, scalded and cooled	$\frac{3}{4}$ c. raisins
6 c. sifted Wingold flour	1 tsp. salt

Dissolve yeast and 1 tblsp. sugar in lukewarm liquid, add 2 c. of flour, the lard or butter and sugar well creamed, and beat until smooth. Cover and set aside to rise in a warm place, free from draft, until light—about $1\frac{1}{2}$ hrs. When well risen, add raisins well floured, the rest of the flour to make a soft dough, and lastly the salt. Knead lightly. Place into well greased bowl, cover and let rise again until double in bulk—about $1\frac{1}{2}$ hrs. Mould into loaves, fill well greased pans half full, cover and let rise until light—about 1 hr. Glaze with egg diluted with water, and bake 45 min.

RYE BREAD

1 cake Fleischmann's yeast	5 c. rye flour
1 c. milk, scalded and cooled	$1\frac{1}{2}$ c. sifted Wingold flour
2 c. lukewarm water	1 tblsp. lard or butter, melted
	1 tblsp. salt

Dissolve yeast in lukewarm liquid, add $2\frac{1}{2}$ c. rye flour, or enough to make sponge. Beat well. Cover and set aside in a warm place, free from draft, to rise about 2 hrs. When light, add white flour, lard or butter, rest of rye flour, or enough to make a soft dough, and the salt. Turn on a board and knead, or pound it 5 min. Place in greased bowl, cover and let rise until double in bulk—about 2 hrs. Turn on board and shape into long loaves. Place in shallow pans, cover and let rise again until light—about 1 hr. Brush with white of egg and water, to glaze. With sharp knife cut lightly three strokes diagonally across top, and place in oven. Bake in slower oven than for white bread. Caraway seed may be used if desired.

STEAMED BOSTON BROWN BREAD

1 c. corn meal	$\frac{1}{2}$ c. molasses
1 c. rye meal	1 c. sour milk
1 c. graham flour.	1 tsp. soda
1 tsp. salt	

Mix dough thoroughly, then put into three one pound baking powder cans and steam for $2\frac{1}{2}$ hrs. Be sure to grease covers and put them on.

WHITE BREAD

(Comp. Yeast)

1 pt. milk scalded	1 tblsp. salt
1 pt. boiling water	1 heaping tblsp. lard
1 Fleischmann's comp. yeast	Pinch of soda
3 qts. Wingold flour, sifted and warmed	2 tblsp. sugar

Mix thoroughly the water, milk, sugar, and $\frac{1}{3}$ of the flour. Dissolve yeast in $\frac{1}{4}$ c. warm water. When yeast is dissolved and first mixture cooled, combine the two and beat well. Set into warm place

for $\frac{1}{2}$ hr., then add the remainder of the flour with the soda, shortening, and salt. Knead stiff and set away till doubled in bulk. It may be kneaded once more, or may be formed into loaves at once. This recipe makes four or five loaves.

WHITE BREAD

(Yeast Foam)

At noon boil one medium potato, mash and add 1 c. of the hot potato water, flour enough to make a batter, add 1 cake yeast foam dissolved in lukewarm water. Beat into batter and let rise. Early in the evening take $1\frac{1}{2}$ qts. warm water and flour enough to make batter. Stir in yeast and let rise till light, then add 1 tblsp. butter, 1 tblsp. lard, and salt to taste, and flour enough to make stiff dough. Knead well. Keep in warm place until morning. Put into loaves and let rise until light. Bake 1 hr. This makes five loaves. When done, brush with butter, and cover with cloth till cold.

WHITE BREAD

(Without Shortening)

2 c. potato water or milk	3 pts. Wingold flour
2 tsp. sugar	$\frac{1}{2}$ cake Fleischmann's yeast
2 tsp. salt	$\frac{1}{4}$ c. warm water

Dissolve yeast and sugar in warm water. Cool the potato water or scalded milk and add salt and dissolved yeast. Gradually add the flour, then knead well. Keep in warm place and let rise $1\frac{1}{2}$ hrs. When light, knead down and let rise again, about 1 hr., then form into two loaves. Let rise in pans for 45 min. or until light; then bake about $\frac{3}{4}$ hr. in hot oven.

WHITE BREAD

(Quick Method)

2 cakes Fleischmann's yeast	2 tblsp. lard or butter, melted
1 qt. lukewarm water	3 qts. sifted Wingold flour
2 tblsp. sugar	1 tblsp. salt

Dissolve yeast and sugar in lukewarm water, add lard or butter, and half the flour. Beat until smooth, then add salt and balance of the flour, or enough to make dough that can be handled. Knead until smooth and elastic. Place into greased bowl, cover and set aside in a moderately warm place, free from draft, until light—about $1\frac{1}{2}$ hrs. Mould into loaves. Place into well greased bread pans, filling them half full. Cover and let rise 1 hr., or until double in bulk. Bake 45 to 60 min. If a richer loaf is desired, use milk in place of part or all of the water.

WHOLE WHEAT BREAD

1 cake Fleischmann's yeast	3 tblsp. brown sugar
$1\frac{1}{2}$ c. lukewarm water	3 tblsp. lard or butter, melted
$1\frac{1}{2}$ c. milk, scalded and cooled	$7\frac{1}{2}$ c. whole wheat flour
	$1\frac{1}{2}$ tsp. salt

Dissolve yeast and sugar in lukewarm liquid. Add lard or butter, then flour gradually, as whole wheat flour absorbs moisture slowly, adding enough to make dough that can be handled, and the salt.

Knead thoroughly, being sure to keep dough soft. Place into well greased bowl, cover and set aside in a warm place, to rise for about 2 hrs. When double in bulk, turn out on kneading board. Mould into loaves, place into well greased pans, cover and set to rise again for about 1 hr., or until light. Bake 1 hr., in a slower oven than for white bread. If wanted for over night, use $\frac{1}{2}$ cake of yeast and an extra $\frac{1}{2}$ tsp. salt.

2 scant qts. Wingold flour	4 hard boiled yolks
1 tsp. Calumet baking powder	$\frac{1}{2}$ c. sugar

Work butter into flour sifted with baking powder, as for pie. Mix raw and boiled yolks thoroughly, then add sugar and add to first mixture. Add flavor, and beaten whites last. Roll thin, and cut same as doughnuts. Cover with egg white, sugar, and chopped blanched almonds. Bake a delicate brown in medium oven.

$\frac{1}{2}$ cake Fleischmann's yeast	$\frac{3}{4}$ c. sugar

Dissolve yeast in warm water, then add to milk, and add other ingredients. Beat thoroughly, then set into warm place to rise. When light add $\frac{1}{4}$ c. melted butter, 1 c. currants, $\frac{1}{2}$ tsp. each cinnamon and nutmeg and about 4 extra c. of flour. Knead thoroughly, then let rise till light. Shape into small round cakes and place into well greased tins; when light, bake in medium oven about 30 min. Let stand until cool, then add yeast dissolved in warm water, and stir in flour with a spoon until the batter is stiff enough to pour out on moulding board; mould lightly 10 min., using no more flour than is necessary. Let rise, shape into rolls, handling little as possible. Let rise again and bake 20 min. in hot oven. This makes about 100 rolls.

Spread all over with soft butter, and sprinkle with sugar, cinnamon, grated lemon rind and currants. Roll up like a jelly roll, cut off slices an inch wide, lay them with the cut side down onto well greased pans, and when light bake in a hot oven 15 or 20 min. When nearly done,

SOME HINTS FOR CAKE BAKING

Accuracy in measurement of all materials is absolutely necessary. Every kitchen should be provided with glass or tin measuring cups, an egg whip for the white of the egg, a rotary beater for the yolks, a wooden spoon with slotted bowl for creaming of butter, and mixing. Prepare the pans first. Grease the bottom, but not the sides of the cake pans. Use vegetable oil or lard instead of butter for greasing the pans. Flour the sides and the bottom. A paper is necessary for fruit loaf cakes or for any cake baked in a long sheet. Do not grease either paper or pan, unless the paper does not entirely cover the bottom of the pan. Then grease the uncovered bottom and corners. After the pans are ready, measure all ingredients before beginning the mixing. Always sift the flour once before measuring. Then add the baking powder and sift two or three times. In making measurements, level off the cup or spoon with a knife. The proper proportion of baking powder is one level tsp. for each level c. of flour. The whites and yolks of eggs should be beaten separately unless otherwise directed. If the butter is cold and hard, warm the sugar. Never melt the butter. Begin the baking of cakes in a slow oven. As soon as the cake batter has risen to its full extent, increase the heat and when well set and lightly browned, reduce the heat. A cake containing many eggs may be toughened by too hot an oven. If sour milk or molasses is used, neutralize the acid with the smallest bit of soda and use about half as much baking powder as with sweet milk, or in the proportion of $\frac{1}{2}$ level tsp. to each cup of flour. If fruit or nuts sink to the bottom of the cake, it shows that the batter is too thin. Cakes baked in shallow or layer cake pans require about one-fifth more flour than when baked in loaf pans. A corresponding proportion of baking powder should also be used. When many egg whites are required a few drops of lemon juice or vinegar added to the whites when beaten foamy will be an advantage, as the acid has the property of keeping the air cells in tact. This is particularly true in making meringues. A cake is ready to be taken from the oven when it will spring back after a slight pressure of the finger. Many ovens have too great heat in the upper part; then place a shallow pan containing a little water onto the upper rack directly over the cake. The standard measuring cup is one containing one half pint. When dry, liquid, and fat ingredients are used in the same recipe, measure in order stated above, always using same cup.

HIGH ALTITUDES

Almost all cake recipes are compounded for low altitudes and the amount or proportion of flour depends on the altitude. For instance, a cake recipe calling for $2\frac{1}{2}$ c. of flour in ordinary altitudes would in Butte or Denver, or any point in the mountains, require 3 c., about $\frac{1}{5}$ more flour. Use a little less shortening, less sugar, less baking powder, but add to the amount of flour and eggs.

Boiled custard is done when it coats the spoon, if boiled too long, it will curdle. If a custard curdles, put into pan of cold water immediately and beat with Dover beater until smooth. Dip the spoon into the materials and strike off with straight edge of a knife.

In measuring butter, lard or margarine, pack the cup or spoon closely and strike off with the straight edge of a knife.

In measuring flour in the cup measure, tap the measure lightly to insure of no unfilled spaces.

To measure $\frac{1}{2}$ teaspoon divide a level teaspoonful lengthwise.

To measure $\frac{1}{4}$ teaspoon divide the half teaspoon once crosswise.

A heaping measure, whether spoonful or cupful, means all the measure will hold.

A teaspoon dipped full and drawn under the side of the can of CALUMET gives practically a teaspoon and a half. This is a quick method to measure the one and one-half teaspoon to each cup of flour in making breads, biscuit, muffins, etc.
